# Discover the freedom of remote INR monitoring.

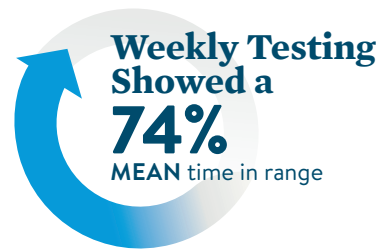

Monitoring your INR with Acelis Connected Health\* lets you get your INR results at home, or wherever it's convenient for you. With remote INR monitoring, your test results are available immediately, so you know if you are within your physician's prescribed therapeutic range.

## Safety, made simple.

Remote INR monitoring was shown to offer a high level of INR control with weekly self-testing in the largest retrospective study of warfarin patient self-testing ever done: the STABLE (Self-Testing Analysis, Based on Long-term Experience) study.

## What did the STABLE study find?

- Patients who tested their INR weekly had a mean time in range of 74%, versus 68.9% for the variable testers, and maintained or improved this control over the two-and-a-half-year study.
- Patients aged 65–74 years showed a greater time in their target ranges than patients at other ages.

1. STABLE results: warfarin home monitoring achieves excellent INR control, The American Journal of Managed Care, 2014 Mar;20(3):202-9.

\*Available in the U.S. only.

## This is all it takes.

A qualified trainer from Acelis Connected Health can show you how to test yourself.

- 1. DRAW A SMALL DROP OF BLOOD** with a simple fingerstick.
- 2. TEST YOUR BLOOD** using the INR meter we provide.
- 3. REPORT YOUR RESULTS** in seconds, using one of the following:

**Our ACH HealthCheck app for phones or tablets**, which also makes it easy to receive reminders and other communications from your doctor.

Our website: **ACHHealthCheck.com**

Our self-service automated phone system: **1-855-209-8400**

Your doctor will be notified as soon as your results arrive.

## It's covered by Medicare and private insurances.

Remote INR testing is a covered benefit for those with an accepted diagnosis by Medicare as well as private health policies. Our benefit-verification team will determine your eligibility and copays. You provide your insurance company and ID number, and we take care of the rest.

## We support you at every step.

Our full-service program includes everything you need to get started and begin routine testing. We guide you through the enrollment process. Our personalized training ensures you or your caregiver are comfortable with the simple steps for testing and reporting your results. We also make it easy to reorder supplies when you need them, based on your adherence to your prescribed testing frequency. And our customer service representatives are always ready to help with testing questions, the meter, or your insurance coverage.

## It's easy to get started.

Ask your doctor about remote INR monitoring, and whether it's right for you. If it is, simply have your physician's office send a completed prescription form to our patient enrollment team. You also can call us directly at **1-877-262-4669**, and we'll work with your doctor to obtain the proper forms and information.

## Find out more on our website.

Want additional details on how remote INR monitoring can offer you greater convenience, easier reporting, and INR control? Check out **PTINR.com**. There you'll find a wealth of information and tips that are invaluable for people who are taking warfarin. All presented in a way that makes it fast and simple to find what you're looking for.

## Frequently Asked Questions

### Q: What is remote INR monitoring?

**A:** Since warfarin helps prevent blood from clotting, it needs to be monitored frequently for your safety. The measure that matters is your INR (International Normalized Ratio) level. Traditionally this came from a venous draw at a doctor's office or at a lab. Our remote INR monitoring service, as prescribed by your physician, however, lets you get your INR results for your doctor at home, or wherever it's convenient.

### Q: Is remote INR monitoring right for me?

**A:** If you expect to be taking warfarin long-term (for one year or more), you value the convenience of testing at home or when you're traveling, and you or a caregiver are able to follow a doctor's orders and prescription instructions, you're most likely well suited for remote INR monitoring. To be sure, have a talk with your doctor.

### Q: How is my doctor involved?

**A:** Your doctor prescribes our service and is notified after you test to ensure your INR remains stable in between office visits. We report your results according to your physician's instructions.

### Q: How much training does it take?

**A:** We will help get you started with a personal training session. Our network of qualified trainers can come to your home, or a trainer at your doctor's office will provide assistance on how to obtain a blood sample with a simple fingerstick, use the INR meter and report your results. In addition, our patient support team is available to help answer any questions that you may have.

## Notice of Privacy Practices

THIS NOTICE DESCRIBES HOW MEDICAL INFORMATION ABOUT YOU MAY BE USED AND DISCLOSED AND HOW YOU CAN GET ACCESS TO THIS INFORMATION. PLEASE REVIEW IT CAREFULLY.

As required by the Health Insurance Portability and Accountability Act (HIPAA), Acelis Connected Health and the members of its Affiliated Covered Entity (ACH ACE, we, us or our) will be providing you with this Notice of Privacy Practices (Notice) describing (1) the uses and disclosures of health information that may be made by ACH ACE, (2) your rights under HIPAA, and (3) ACH ACE's legal obligations with respect to your health information. Health information includes individually-identifiable medical, insurance, demographic and medical payment information, such as information about your diagnosis, medications, insurance status, medical claims history and policy information. ACH ACE is committed to protecting the privacy and confidentiality of your health information.

Although you will receive a full copy of of this Notice of Privacy Practices at time of training, you may request a full copy at any time by calling Acelis Connected Health at **1.877.262.4669** or you may view it at **PTINR.com**.
